

Please respect our new hygiene requirements!

With great care and responsibility, we do our best to meet the challenges set by the Corona virus.

It is mandatory to wear a nose/mouth protection mask not only on entering the Science & Study Center but also while moving inside the building, except for when seated in the seminar room and for when eating and drinking.

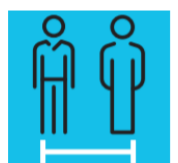

On arrival, please sign the register at reception. Contact details of participants are retained so that in case of infection all can be traced back. This list will be destroyed in compliance with data protection regulations after four weeks.

Please avoid touching (e.g. shaking hands or hugs) when you greet other people or say goodbye.

Please maintain distance at least 1.5 m from other persons.

Please maintain distance in hallways and the restroom areas. There is only one person allowed in the washing area of restrooms and the luggage room.

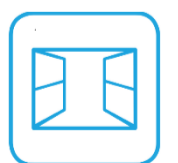

Please cough or sneeze properly by using a paper tissue or holding the crook of your arm in front of mouth and nose.

Wash your hands regularly. Please sanitize your hands before entering the catering area (Arched hall and vaulted hall).

Please keep your hands away from your face.

Please ventilate your reserved seminar room(s) several times a day for a few minutes. Doors of the seminar rooms have to be open at all times during your event.

Please wear the provided rubber gloves when using the presenter's case as well as the technical equipment (e.g. screen, ClickShare) and dispose them properly afterwards.
